

FOR PLANTERS

# YOU CAN HELP GROW NEW ZEALAND'S TREE COUNT. HERE'S HOW...

Thousands of people dedicate their time and effort to restoring New Zealand's native ecosystems. The conservation work carried out by these communities is vital not only for the intrinsic value of our biodiversity, but also for the health and prosperity of New Zealand.

Trees That Count is an ambitious conservation movement which aims to celebrate restoration work, and enable New Zealanders to plant more native trees.

We're building a picture of the planting efforts in New Zealand every year by counting the native trees which are planted by community groups, government agencies, landowners, schools and people in their own backyards. By doing this we can measure the collective impact of this work.

But we want to see millions more planted. Our community marketplace helps to increase native tree planting in New Zealand. We do this by providing planters who successfully apply with free native trees which have been funded by businesses and individuals throughout New Zealand.

## WAYS TO GET INVOLVED:

**ADD TREES**  
YOU'RE PLANTING  
TO THE COUNT

**APPLY FOR FREE**  
NATIVE TREES SO  
YOU CAN UPSCALE  
YOUR PLANTINGS

**PLEDGE LAND**  
FOR PLANTING ON

**FUND OR GIFT**  
A NATIVE TREE  
FOR \$10

## JOIN US TODAY!

- Become part of the growing Trees That Count movement, and be an important part of New Zealand's planting story by contributing to the count
- All registered planters with Trees that Count can apply for free native trees for community or restoration projects
- Showcase your planting work with your Tree Profile, connect easily with planting volunteers and get on our planter leaderboard
- Our mapping technology enables you to see the trees you've planted on our national map
- Enjoy and share our online technical, planting and monitoring resources.

Add your trees to the count today at [treesthatcount.co.nz](https://treesthatcount.co.nz) and become a part of the movement.
