

REGENERATING AOTEAROA

HIGH-IMPACT NATURE PROJECTS
READY FOR INVESTMENT

For more than thirty years, the Project Crimson Trust (the charity behind Trees That Count) has been upscaling native planting efforts around Aotearoa.

We have hand-selected a suite of restoration projects from around New Zealand that present unparalleled opportunities for green investors. These projects offer potential for significant environmental, social, cultural and economic growth, are large in scale, and are designed for cornerstone financial support. In return, alongside proof of impact (and potential access to verified carbon credits or biodiversity credits), your organisation will be part of some of the most ambitious environmental restoration work undertaken in Aotearoa New Zealand.

THE OPPORTUNITY

Work with us to find a meaningful project for your organisation.

Provide you with proof of impact as outcomes are realised and demonstrate your long-term commitment to our land and our people.

Make your entity part of regenerating an iconic slice of Aotearoa and deepen your engagement with stakeholder communities.

WANT TO KNOW MORE?

Get in touch. We'd love to chat about how large-scale investment could work for your business.
